

## A Seafarer's Dream House Project

Issue 23  
Volume 23

A dream come true for Mr. Darwin and Mrs. Gilan Caluna to finally have their own dream house. The lot was purchased a year before they decided to consult with a reliable architectural firm to have their house constructed.

Mr. Darwin Caluna is a 2<sup>nd</sup> mate of Trans-Global Maritime Agency Inc. and her wife Mrs. Gilan Caluna is an account manager of Fil - Estate Realty Sales Associates Inc. The spouses attended the seminar / briefing conducted by Gruppo Arkitekto Co., Inc at the Paragon Plaza.

Both were interested to personally discuss their design requirements with the Architects of the company. Mr. Darwin had mentioned that they have been joining site tripping from different real estate developers who offer built in houses but refused to purchased one as they don't know the type of materials being used in the construction.

The construction started last March 26, 2013 and the project was turned-over last June 28, 2013. The company achieved the 100% customer satisfaction as the spouses mentioned that everything was completed as planned and that any changes and additions were executed based on their specifications and requirements.

The company believes that the best approach for creating a perfect house is to make it feel like an extension of the client's personality.
